

DimaMaak Monitoring System

Intelligent System for Monitoring Pregnant Women in Rural
Areas

DimaMaak
SANTÉ ET MATERNITÉ CONNECTÉES

CHALLENGES

**High Maternal
Mortality**

**isolation during
childbirth**

**lack of awareness
Guidance**

IOT

SOLUTIONS

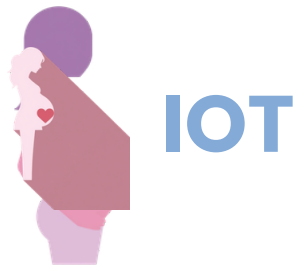

BALANCE
PATIENT&DOCTOR

GUIDANCE
TO WOMEN

REDUCE
MATERNAL ACCIDENTS

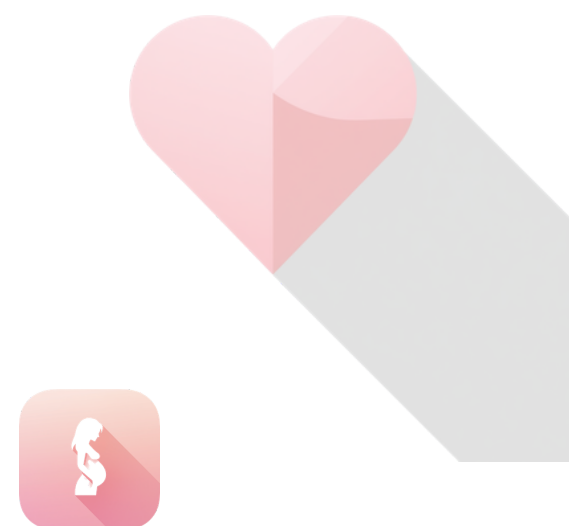

how it works

- ESP32 monitors vital signs (heart rate, SpO2, blood pressure)
- The patient records contractions using a button
- Automatic analysis of contractions and labor phase detection
- Emergency SMS alerts sent to doctor, hospital, and family
- Audio instructions guide the patient during labor
- Real-time data sent to the medical dashboard
- Remote monitoring by the doctor
- Automatic consultation reminders via N8N
